Skills

HTML5/CSS/JS/React

Excellent

Machine Learning/Big Data

Excellent

C++

Excellent

Python

Excellent

R

Excellent

Master of Computer Science graduate, eager to develop further professional skills and to contribute to team success with diligence in humility with team working attitude. Thorough comprehension of complex C++, R, HTML, CSS and JavaScript programming languages. Confidence to work in a new and challenging environment.

Projects

Authorship identification

- A R language based system is developed to be trained and fed by texts for author identification
- Accuracy of 95% was achieved

Behavior of taxi drives

- A project with large datasets of 320 taxi drivers from the metropolitan city of Rome
- The completion of this project went through the processes from data preparation, Model planning, Model building and result.

Website: Books shop

<https://my-books-shop.vercel.app/>

- Working together with other volunteer computing engineers.
- Built by React, Next.js and Strip Checkout.
- Uses also React Hooks to manage local component state.

Education

2011-07 -

2015-06

Bachelor of Science: Software Engineering

Tianjin University Renai College - Tianjin, China

2016-07 -

2018-12

Master of Science: Computer Science

University of Wollongong - Sydney, NSW

Major: Network and information security

Major: Machine Learning and Big data

2019-02 -

2020-12

Bible College

New Zealand Training Centre - Hamilton, New Zealand
